Hedgeye Risk Management  
33971 Selva Rd UNIT 265  
Dana Point, CA 92629

I am seeking to join your team as a Senior Software Engineer where I can generate value for the company using my experience and education.

For the last two years I have been working full time at First American Trust as a Software Engineer on the Automated Banking team, where I am responsible for maintaining and developing microservices and web interfaces to meet the needs of our clients and the business.

I am familiar with a variety of areas of computer science and engineering and have a sound understanding of its fundamentals (programming, mathematics, full-stack development) via projects, courses and professional work. I believe that these qualities alone will make me a great asset for the programming component of this position. In addition to this, I have experience with other essential technologies and skills needed for the position; this includes, but is not limited to: Docker, Kubernetes, Cloud Architecture, Databases and Agile development. More importantly, I have years of experience with software and application construction, integration, design and engineering via numerous courses, projects and professional experience.

Outside of my technical ability, I have had other hobbies which I also believe will allow me to add additional value to the business. At the beginning of my college career, I would travel and compete professionally in a video game called StarCraft II, while simultaneously being a full-time student who consistently made the Dean's honor list. Later, I went on to become an esports coordinator in my universities' gaming club, where I led our Counter-Strike team to become one of the best college teams in the nation. This experience has taught me to effectively work under pressure, take initiative; and approach, analyze and solve complex problems both in a team environment and independently.

Most importantly, I am very passionate about my field of study and hobbies. Computers and competition have fascinated me throughout my entire life, motivating me to constantly learn new things and better myself, professionally and as a person. I believe that my motivation, lively attitude and excellent communication skills will have an immediate positive impact on the company, and as I continue to learn and grow, that impact will only become greater. The attached resume will provide you with more in-depth information on my relevant skills and experience for the position.

Thank you for your time and consideration. You can contact me at (909) 670-4952 or [pirelliandrew@gmail.com](mailto:pirelliandrew@gmail.com)

Best Regards,

Andrew Pirelli
